

## Delta science research blog

The Delta Science Program is thrilled to announce that as a result of the 2021 Delta science proposal solicitation, 16 proposals have been selected for funding to address critical biophysical and social science knowledge gaps in the Delta. A [new blog](#) by Henry DeBey, Dr. Emily Ryznar, Dylan Stern, Dr. Louise Conrad, and Dr. Laurel Larsen highlights the exciting features of the 2021 solicitation, illustrates the diverse set of the newly awarded science, and emphasizes the need to support forward-looking research as we collaboratively grow our science funding program.

## A new Delta Breeze

The inaugural [Delta Breeze newsletter](#) is here! This quarterly newsletter will highlight projects and upcoming opportunities funded by the Delta Science Program and its partners.

## Delta Protection Commission meeting on YouTube

You may now watch the [July 15 Delta Protection Commission meeting](#) video on YouTube! Open the "Show More" panel under the video to view the full agenda, and click on the time links to listen to a specific agenda item.

## Evenings at the Estuary: Tidy Tips for Native Gardening

On July 29, from 5:30 p.m. to 7:30 p.m., virtually join local experts to explore different aspects of gardening with native plants, and get your own questions answered during a facilitated Q&A session. This presentation will cover the basics of gardening with native plants before diving deeper into the intricacies of garden planning based on where you live. For more details and to register, click [here](#).

## Delta Conveyance Project informational webinar on fisheries

On Tuesday, August 3, from 6:00 p.m. to 8:00 p.m., the Delta Conveyance Project will be hosting a virtual informational webinar on fisheries. The topics being discussed will be:

- Environmental setting details, including fish species evaluated, migration patterns, and fish life cycles.
- Fish screen considerations.
- Models, data, and analytical methods being used for evaluating potential impacts.
